

EDUCATION IS THE KINDLING OF A FLAME, NOT THE FILLING OF THE VESSEL

EVENTS OF THE MONTH

Parent Orientation

World Environment Day

Red Day

Bye Bye Mango

Investiture Ceremony

Dear Parents

We have crossed the biggest milestone of our journey to success – the first year of operations at School Of India! On behalf of the management, I extend a very warm welcome to all the existing and new parents, to the School Of India family.

All great ideas begin with a commitment to the future. It is with a strong commitment to the quest for excellence in the field of education that School Of India was established to positively influence the lives of young children and transform them into proud and worthy citizens of India. They will make their mark on the global platform as true Indians. Our students will be taught to take responsibility for their learning and their behaviour in order that they assume responsibility of the society at large as adults.

While our state of the art infrastructure, outstanding teachers, small number of students in each class and innovative programmes are important contributors to the successful fulfilment of School Of India's educational mission, a vital ingredient is our partnership with families who share our core values and educational philosophy. We are delighted that your family will be joining the School Of India community. In order that our best laid plans are executed in the best possible manner, it is imperative that we keep the lines of communication open at all times.

We look forward to your valuable feedback regarding any aspect of our efforts towards grooming your children in a positive and fun filled environment. The best yardstick to measure whether your child's school is going the right way is to check whether the child is happy to go to school every day. If the answer is yes,

you don't have to worry at all. Children are very intelligent. They have to be given the right exposure so that learning happens naturally without conscious effort and yet be enjoyable.

In order to facilitate experiential learning, we have incorporated a programme called Eureka Think Labs in our curriculum, which provides hands on experience in Science and Technology education in schools. We wish to harness the creative potential and curiosity of young students with the exploratory capacities of science. The activities and experiments are designed around daily life objects and observations. Indigenously developed content ensures that students embrace science concepts with ease while enjoying the same.

Life skills is an equally important component of a child's education along with academics. We have introduced 'School Cinema' in our curriculum which is a child centric interactive multimedia programme to inculcate valuable life skills and morals in our students. On behalf of the management, I assure you that we will cater to the holistic development of our students many folds more than your expectations!

Together, let us make the academic session 2015-16 an eventful year for our children by upholding the motto of our school 'Nationalism before Internationalism'!

Parent Orientation

The Parent Orientation Meet was held on 30th of May 2015. The parents were briefed about the vision and mission of School Of India. The parents interacted with the class teachers and cleared all their doubts regarding the day to day functioning of the school. Manila Ma'am addressed the gathering on behalf of the management and assured the parents of all round developed of the children at School Of India.

World Environment Day

Students of School of India planted a variety of saplings to foster the spirit of oneness and express their gratitude towards Mother Nature. Trees have long served humanity in one form or the other. On the other hand humans have only threatened their very existence. Now it is our turn to reverse the damage that we have caused and restore the balance between nature and man; and the first step towards this change is to plant trees.

Pre-primary Celebrating Red Day

To introduce the tiny tots to the world of colours, we celebrate colour day every month. As a start, on the 12th of June, the preprimary children celebrated "The Red Day". They were dressed in red colour clothes, brought red toys and red colour food items in their snack boxes.

Bye-bye Mango

Mango is the National fruit of India. In India, we have hundreds of varieties of mangoes. We celebrated a fun activity called " Good bye Mango" in School of India and children enjoyed eating mango in the traditional way using their hands.

Investiture Ceremony

School of India celebrated its 2nd Investiture ceremony on 26th June, 2015. On this auspicious occasion the school appointees were presented with the school flag and badges. The ceremony was graced by the presence of dignitaries from the school management. The newly appointed leaders had turned out immaculately dressed in their school uniform. The proud parents had tears of joy in their eyes when they saw their children receiving flags and badges on the stage. School Of India now has a 22 member student council. The young leaders promised to discharge their duties to the best of their abilities and take their alma mater to greater heights of excellence.

Regards

Shyamashree Chatterjee
